

Smartcare

An innovative
approach to art
conservation

FRAGILE

proXimus

Inadequate climate conditions such as high temperatures, extremes and fluctuations of relative humidity or high light conditions, can elevate the risk of material deterioration.

Based on our 20+ years of experience in conservation we have learned that damage can be prevented by monitoring the climate and ensuring correct and stable climate conditions.

By performing continuous measurements with a Smartcare datalogger and disclosing data via the SmartCare app we put you in control of the condition of your works. Moreover, our conservators' eyes are on your collection's climate conditions continuously.

In this way we can provide advice and assistance on how to take care of your collection, prevent damage and safeguard its value by taking preventive measures to improve the conditions.

Meet Smartcare, a small and discrete plug and play datalogger measuring temperature, relative humidity, visible light and presence without SIM card or network registration. This datalogger can be used at home, in your storage facility, museum or gallery. The loggers can even keep in contact during transport.

This logger is accompanied by a personalized collection management service to enable collection care:

- | Collection owner has access to online personal account with easy-to-read data sheets and graphs
- | Build-in threshold templates for specific materials or locations.

Smartcare services

- | Risk assessment of storage and/or display location
- | On site assistance with placement and installation
- | Alarm within 48 hours in case of elevated risk levels
- | Yearly reporting and analysis, more often if needed

Technical features

- | Wireless (LoRa network)
- | Responsive web application 'smartphone friendly'
- | Alarm system via email or sms
- | High sensitivity sensors
- | Up to 10 min. measuring interval
- | Battery lifespan of 2 years
- | GDPR compliant
- | Strongly secured end-to-end

Guarantee

- | Follow-up by consultant preventive conservation
- | Back-up by certified conservators, specialized in different art typologies and materials
- | Uptime 24/7

The Smartcare service is available on a subscription basis. The pricing depends on the need and requirements of the collection owner and the collection.
