**Low
Code**

Low code
No code?

Low code/no code?

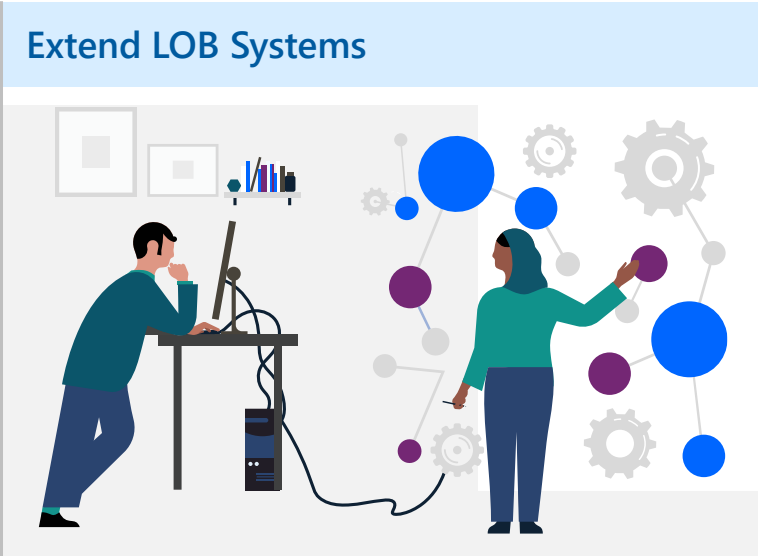

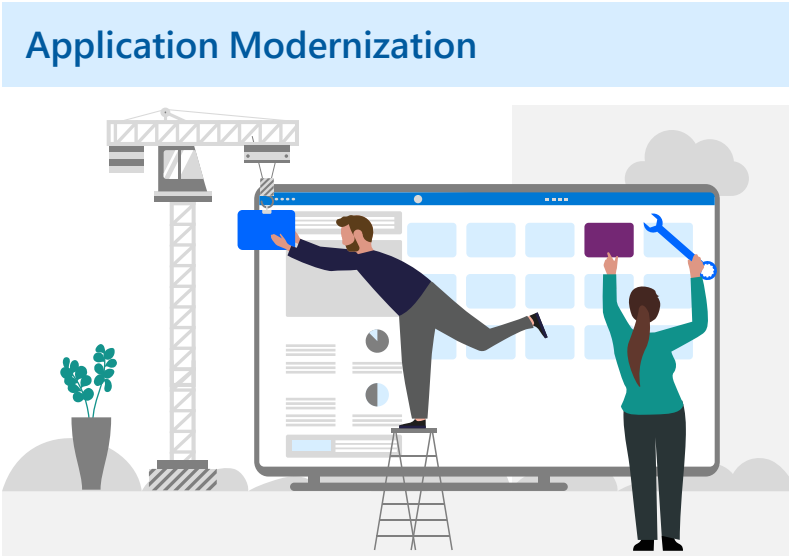

A textbook definition:

Low code is a way of **software development** that aims to build **advanced applications** with **less programming work** and **less specialist programming knowledge**.

No code is the same, but **without** any programming work and programming knowledge.

Low code unlocks value across your business

Let's build an app. What should it do?

Collect RSVPs Track sales leads List inventory Manage inspections

Use everyday words to describe what your app should collect, track, list, or manage ...

This feature uses generative AI. [See terms](#)

Other ways to create an app

- Start with data**
Create a table, pick an existing one, or even import from Excel to create an app.
- Start with a page design**
Select from a list of different designs and layouts to get your app going.
- Start with an app template**
Select from a list of fully-functional business app templates. Use as-is or customize to suit your needs.
